

10th September 2018

Dear Parents/Carers,

We have had reports of head lice in school. Please could we ask that you check your child's hair daily and take the necessary action as needed. More than one treatment is normally required in order to be effective.

We please ask that you take a responsible approach to this issue as, when left untreated, the head lice will continue to spread and as I am sure you are aware will be very uncomfortable for the children.

It is advisable that any students with long hair have it tied back in order to help stop the spread of infection.

Thank you for your assistance. If you have any queries please contact school.

Helen Redmond

Headteacher
